

ACOUSTICS

BLÅ STATION

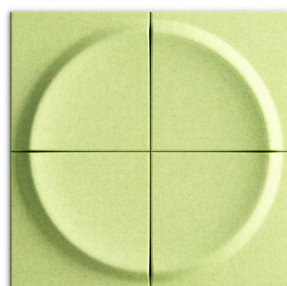

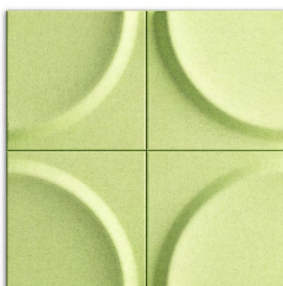

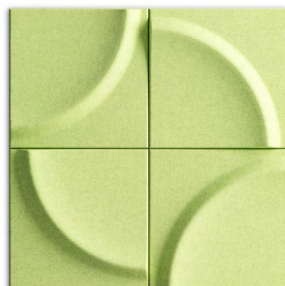

Dimensions:
Height 42cm
Width 50cm

GINKGO

Design | Stone Designs 2014

Inspired by the iconic ginkgo trees that each season colour the city of Tokyo in different shades. Ginkgo is an attractive sound-absorbing wall panel fixed with magnetic fittings. Create your landscape, choose your colour scale, and build your pattern. Ginkgo reduce ambient noise and echoes in the room. You can easily move the Ginkgo's around when you feel like it by changing the position of the colours and you can change the direction of the pattern using the same fixing points. Ginkgo can bring different inspirational landscapes into your indoor environment.

GAIA

Design | Stone Designs 2016

Gaia is a square sound absorber with a quarter of a circle as pattern. Four pieces becomes a full circle. Gaia is inspired by the four elements: fire, earth, wind, and water and can be combined in millions of different ways with an infinite range of possible combinations. Use only one colour or many and attach it to the wall with magnetic fittings. Gaia is easily rotatable generating a new effect on the wall, creating a living surface.

Dimensions:
Height 65cm
Width 65cm

Design your own Arc, Gaia or Ginkgo wall! Use the Wall Planner on our website and build the combinations you like.

ARC

Design | Stone Designs 2019

ARC has an easily recognizable architectural shape inspired by the arcades of the Colosseum in Rome and, due to its shape and dimensions, can be used in many vertical and horizontal configurations.

All our wall panels are made in PET form felt of which at least 55% is recycled. Our acoustic panels can be covered with wool fabric on the surface to add color to the interiorenvironment. (Wall panels with 30% hemp fibers have 50% PET and 20% recycled PET)

Dimensions:
Height 90cm
Width 45cm
